

Public-Private Partnership

Doing Business with Georgia Government

Many GMOA members are able to expand their businesses by bidding on state contracts for bus (and other) business opportunities.

To do this, you must register your business with the State of Georgia (or local governments if you want to seek local contracting opportunities - contact them directly).

To register to do business with the State of Georgia, to get notice on state bidding opportunities for potential business, and for other information, see the GA Department of Administrative Services (DOAS) website at:
